

EVANS OTIENO OMBATO

ICT OFFICER & LECTURER

+254 702 432 987 • evansombato@gmail.com • Nakuru, Kenya

PROFESSIONAL PROFILE

A highly motivated ICT professional combining hands-on Systems Administration expertise with proven experience as an ICT Lecturer in TVET institutions. Skilled in managing network infrastructure, databases and health-information systems, while also designing CDACC-aligned curricula, delivering competency-based instruction, and mentoring students. Recognized for strong troubleshooting ability, data integrity, and commitment to both technical excellence and quality teaching.

AREAS OF EXPERTISE

- | | |
|--|--|
| ● Network Design, Configuration & Management | ● Lesson Planning & Instructional Delivery |
| ● Systems Administration (Windows, Linux, macOS) | ● Curriculum Development for ICT Programmes |
| ● Hardware & Software Troubleshooting | ● TVET-CDACC Assessment & Grading Standards |
| ● Database Administration & Data Integrity | ● Classroom & Laboratory Management |
| ● Data Backup, Recovery & Security | ● Student Mentorship & Academic Support |
| ● Digital Records & Health Information Systems | ● Competency-Based Education & Training (CBET) |
| ● ICT Policy & Data Protection Compliance | ● Learner Performance Evaluation & Reporting |
| ● IT Asset & Inventory Management | ● Router, Switch & Access Point Configuration |
| ● End-User Training & Technical Support | ● Programming Instruction (C, C++) |

KEY ACHIEVEMENTS

- Sustained near-uninterrupted network uptime across NCHSM campus through proactive infrastructure monitoring and maintenance.
- Strengthened data integrity for institutional health records and examination results through rigorous verification protocols.
- Reduced average technical-support resolution time by promptly triaging and resolving end-user hardware and software issues.
- Consistently improved learner practical competencies through structured, competency-based lesson delivery and mentorship.
- Designed and delivered CDACC-aligned assessments that strengthened grading accuracy and examination integrity.
- Built strong learner engagement through varied, student-centred instructional techniques across multiple ICT courses.

CAREER HISTORY

ICT Officer, Lecturer & Systems Administrator

Nakuru College of Health Sciences & Management | **January 2025 – Present**

- Administer, monitor and maintain the institution's end-to-end ICT infrastructure, including servers, workstations, network devices and peripheral equipment, ensuring maximum uptime across departments.
- Configure, secure and maintain network infrastructure — routers, switches and wireless access points — to guarantee optimal performance, connectivity and coverage across teaching, administrative and clinical-training areas.
- Design and deliver structured lessons in Digital Literacy, Computer Essentials, Computer Operations, Computer Networking and Health Records Database Management to diverse student cohorts.
- Develop comprehensive curricula, schemes of work, lesson plans and learning materials aligned to TVET-CDACC competency-based standards.
- Manage and continuously update the institution's health records database, ensuring all digital entries are accurate, complete and compliant with data protection standards.
- Design and administer formative and summative assessments, including practical examinations, ensuring alignment with CDACC grading criteria.
- Support the Examinations Office by scheduling, compiling and processing internal and external (CDACC) assessments for a large, multi-programme student body.
- Lead preparation of student candidate lists and coordinate result verification processes to guarantee data integrity across all examination cycles.
- Provide one-on-one academic mentorship and remedial support to learners, strengthening their theoretical understanding and practical competencies.
- Provide first- and second-line technical support to staff, faculty and students, diagnosing and resolving hardware, software, connectivity and application issues promptly.
- Facilitate practical, hands-on laboratory sessions covering network setup, systems administration and database operations to reinforce classroom theory.
- Install, configure and maintain desktop computers, laptops, printers and laboratory ICT equipment across academic and administrative departments.
- Implement structured data backup and disaster-recovery routines to safeguard institutional records, student data and examination results against loss or corruption.
- Maintain an accurate ICT asset inventory and consumables register, and initiate procurement requisitions for hardware, software licences and networking equipment.
- Monitor and document learner progress, attendance and performance trends, preparing periodic reports for academic leadership.
- Enforce ICT acceptable-use policies, password and access-control protocols, and data-confidentiality practices in line with the Kenya Data Protection Act, 2019.
- Mentor students on professional and ethical use of ICT systems, including data protection principles under the Kenya Data Protection Act, 2019.
- Participate in curriculum review meetings and departmental planning to continuously improve programme relevance and quality.

ICT Trainer & Systems Administrator

Elgon View College – Migori Campus | **May 2024 – December 2024**

- Trained students in advanced computer applications, programming fundamentals (C, C++), software development principles and networking concepts.

- Configured, deployed and maintained campus network infrastructure — routers, switches and access points — to ensure stable, high-speed connectivity for computer laboratories and administrative offices.
- Developed detailed training materials, lesson plans and varied assessment methods to ensure comprehensive, competency-based learning.
- Administered computer laboratory systems, performing routine maintenance, software installation, updates and security patching across all lab workstations.
- Delivered one-on-one mentorship to learners, building their confidence and strengthening practical technical skills.
- Coordinated departmental assessment logistics and compiled comprehensive examination reports for the ICT section, ensuring accuracy and timely submission.
- Managed the full lifecycle of examination administration — from paper preparation and invigilation support to digital result entry and archiving.
- Facilitated classroom and laboratory sessions with strong classroom management, ensuring an engaging and disciplined learning environment.
- Monitored system performance and security settings, proactively identifying and resolving vulnerabilities before they affected operations.
- Liaised with the ICT Department leadership on infrastructure upgrades, equipment procurement needs and network expansion planning.

Computer Lab Attendant & Assistant IT Trainer

Rongo University (Student Work-Study Programme) | **September 2023 – April 2024**

- Oversaw the day-to-day operation and readiness of laboratory computer systems, ensuring all stations were functional ahead of scheduled classes and examinations.
- Assisted in facilitating practical computer application and IT systems training sessions for students and staff.
- Diagnosed and resolved hardware and software faults reported by students and faculty, escalating complex issues to senior ICT staff where necessary.
- Assisted in configuring lab workstations with required software packages, operating system updates and network access for coursework.
- Provided peer mentorship and technical guidance to fellow students during coursework and lab assignments.
- Maintained lab usage logs and equipment condition records to inform maintenance scheduling and resource planning.

EDUCATION

Bachelor of Science in Computer Science

Rongo University | 2019 – 2023 | *Second Class Honours (Upper Division)*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Continuous Professional Development — CBET Delivery Training
- TVET-CDACC Assessment and Grading Standards (institutional training)

NOTABLE PROJECTS & INITIATIVES

Health Records Digital Database Rollout — NCHSM

- Contributed to the ongoing digitisation of student and health-records data, migrating paper-based records into a structured digital database.
- Established data-entry and verification protocols to minimise duplication and transcription errors during the migration process.
- Trained departmental staff on correct use of the digital records system to sustain data quality after handover.

CDACC Examinations Coordination — NCHSM & Elgon View College

- Coordinated end-to-end logistics for internal and external CDACC assessments across multiple programmes and cohorts.
- Compiled and cross-checked candidate lists, marks schedules and result summaries to ensure examination integrity.

Campus Network Stabilisation Initiative

- Audited existing network infrastructure and identified connectivity gaps affecting teaching and administrative areas.
- Reconfigured routers, switches and access points to improve coverage, stability and speed across campus.

PROFESSIONAL STRENGTHS

- Dual competence in ICT systems administration and classroom instruction, allowing seamless movement between technical operations and academic delivery.
- Strong attention to detail and data accuracy, developed through examinations coordination and health-records database management.
- Effective communicator able to translate technical concepts into accessible, student-friendly instruction.
- Reliable under pressure, with a track record of maintaining system uptime and meeting examination deadlines simultaneously.
